

Testimonials - Training & Speaking

Thank you for the training workshop, Creating a Values-Based Business, that you conducted for the participants in our Spring and Fall Entrepreneurial Training Programs.... Your three-hour seminars were excellent. Your material helped them better formulate and express their vision and mission statements for their businesses. Most important, Creating a Values-Based Business helped them recognize the importance of having their personal and business values in alignment.... Your workshops are destined to help many more people who are experiencing major changes to better define their goals and develop strategies for success.

Thank you again for speaking at our October 16th service. I received so many wonderful compliments on your sermon entitled "Purpose, Mission, and Vision". ... Working with you was a delight.
